SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

TRADEMARK REGISTRATIONS AMENDED, CORRECTED, ETC.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

Any change to the registration will be indicated at the bottom of each entry under ELEMENTS AMENDED, CORRECTED OR RESTRICTED. With the exception of changes to the goods and services, additions to the registration will appear in asterisks and deletions of the registration will appear in brackets. Elements which are only changed will be listed with no punctuation. As to the goods/services statement, amendments to the goods/services will appear in asterisks and deletions will appear in brackets. In addition if any change to the goods/services occurs, the element "Goods/Services" will be listed under ELEMENTS AMENDED, CORRECTED OR RESTRICTED.

HARRY F. MANBECK, Jr.
Assistant Secretary and Commissioner of Patents and Trademarks.

Notice of Maintenance Fees Payable

Title 37, Code of Federal Regulations, Section 1.362(d), effective Nov. 1, 1984, provides that maintenance fees may be paid without surcharge for a six-month period beginning 3, 7, and 11 years after the date of issue of patents based on application filed on or after Dec. 12, 1980. An additional six-month grace period is provided by 35 U.S.C. 41(b) and 37 CFR 1.362(e) for payment of the maintenance fee with the surcharge set forth in 37 CFR 1.20(k) or (l), as amended effective Apr. 17, 1989. If the maintenance fee is not paid in a patent requiring such payment the patent will expire on the 4th, 8th or 12th anniversary of the patent.

Attention is drawn to the patents which were issued on February 9, 1988 for which maintenance fees due at 3 years and six months may now be paid. The patents have patent numbers within the following ranges:

Utility Patents 4,723,322 through 4,724,545
Reissue Patents based on the above identified patents.

Attention is drawn to the patents which were issued on February 7, 1984 for which maintenance fees due at 7 years and six months may now be paid. The patents have patent numbers within the following ranges:

Utility Patents 4,429,419 through 4,430,758
Reissue Patents based on the above identified patents.

No maintenance fees are required for design or plant patents.

Payments of maintenance fees in patents should be directed to "Commissioner of Patents and Trademarks, Box M. Fee, Washington, D.C. 20231."

The current amounts of the maintenance fees due at 3 years and six months and seven years and six months are set forth in 37 CFR 1.20(e), and (f), as amended Nov. 5, 1990, which are reproduced below:

37 CFR § 1.20 Post-issuance fees and surcharges

"(e) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after Dec. 12, 1980 and before Aug. 27, 1982, in force beyond 4 years; the fee is due by three years and six months after the original grant.....$245.00

"(f) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after Dec. 12, 1980 and before Aug. 27, 1982, in force beyond 8 years; the fee is due by seven years and six months after the original grant.....$495.00"

"(h) For maintaining an original or reissue patent except a design or plant patent, based on an application filed on or after Aug. 27,1982, in force beyond 4 years; the fee is due by three years and six months after the original grant:

By a small entity (§1.9(f)).....$415.00
By other than a small entity.....$850.00"

"(i) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after Aug. 27, 1982, in force beyond 8 years; the fee is due by seven years and six months after the original grant:

By a small entity (§1.9(f)).....$835.00
By other than a small enttity.....$1670.00"

The amounts of the surcharges for paying the maintenance fee during the grace period or after the expiration of the patent are set forth in 37 CFR 1.20(k), (l) and (m), which are reproduced below:

"(k) Surcharge for paying a maintenance fee during the 6-month grace period following the expiration of three years and six months , seven years and six months, and eleven years and six months after the date of the original grant of a patent based on an application filed on or after Dec. 12, 1980 and before Aug. 27,1982.....$120.00"

"(l) Surcharge for paying a maintenance fee during the 6-month grace period following the expiration of three years and six months, seven years and six months, and eleven years and six months after the date of the original grant of a patent based on an application filed on or after Aug. 27, 1982:

By a small entity(§1.9(f)).....$60.00
By other than a small entity.....$120.00"

"(m) Surcharge for accepting a maintenance fee after expiration of a patent for non-timely payment of a maintenance fee where the delay is shown to the satisfaction of the Commissioner to have been unavoidable.....$550.00"

Notice of Expiration of Patents Due to Failure to Pay Maintenance Fees

35 U.S.C. 41 and 37 CFR 1.362(g) provide that if the required maintenance fee and any applicable surcharge are not paid in a patent requiring such payment, the patent will expire at the end of the 4th, 8th, or 12th anniversary of the grant of the patent depending on the first maintenance fee which was not paid.

According to the records of the Office, the patents listed below have expired due to failure to pay the required maintenance fee and any applicable surcharge.

SURVEY OF REGISTERED PRACTITIONERS IN PATENT CASES

Pursuant to 37 CFR 10.11(b), a survey letter was mailed on Nov. 30, 1990 from the Office of Enrollment and Discipline (OED) to all practitioners in patent cases whose last names began with T through Z. Enclosed with the letter was a data sheet which should have been completed and returned to OED as soon as possible. Failure by a practitioner to submit a completed data sheet within the time period specified in the survey letter will result in the practitioner being removed from the register in accordance with 37 CFR 10.11(b).

If your last name begins with T through Z and you did not receive a data sheet or of you returned the data sheet to OED and you did not receive an acknowledgement within three (3) months after mailing the data sheet to OED, please contact Shirley B. Rasheed at (703) 557-1728.

Filing of Certain Trademark Papers and Authorizations to Charge Deposit Accounts by Facsimile Tranmission

Effective Feb. 12, 1991, the Trademark Examining Operation (TMEO) and the Office if the Assistant Commissioner for Trademarks (A/C TM) will implement a pilot program to study the feasibility of accepting certain trademark documents by facsimile transmission (fax). The information gathered from this program and the pilot program currently in place for acceptance of certain patent documents by fax, *(See 1096 Official Gazette 30, November 15, 1989)*, will be evaluated for the purpose of drafting a rules package governing the fax procedure. The Trademark Trial and Appeal Board will not participate in the program at this time, but may consider accepting fax tranmissions at a later date.

Because this is a pilot program, only select documents will initially be accepted via facsimile transmission. These trademark documents include, but are not limited to: (1) Responses to Office Actions (but not those which include specimens of use and/or drawings; (2) Petitons to the Commissioner; (3) Letters of Protest; (4) Deposit Account Authorization; and (5) Requests for Reconsideration.

Documents Excluded from Fax Transmission

Any document to be filed with Trademark Trial and Appeal Board, including the notice of ex parte appeal, will *not* be accepted by fax transmission.

Any documents which include specimens, drawings or certifications or certified copies of forgien registrations or court orders, etc., will also *not* be accepted by fax transmission. Thus, the following documents will not be accepted by fax:

Trademark Applications;
Responses to Office Actions and Other Submissions which Include Specimens of Use and/or Drawings;
Section 8 Affidavits or Declarations;
Renewal Applications;
Statements of Use;
Amendments to Allege Use;
Certifications or Certified Copies of Foreign Registrations, and renewals thereof;
Section 7 Requests to Amend the Mark in a Registration:
Section 7 Applications for Voluntary Surrender of a Registration; and
Certified Copies of Court Orders.

When any trademark document explicitly excluded from the fax transmission procedure is received in the PTO via fax transmission, the document will not be considered as having been filed. The sender will be notified that the paper was improperly tranmitted by fax. It is impermissible to file papers by fax and submit the supporting exhibits by mail.

The fax machines will be attended betweeen the business hours of 8:30 a.m. and 5:00 p.m., East Coast Time, Monday through Friday, excluding holidays. Although the fax machines may normally be accessed 24 hours a day, there may be times, even during business hours, when reception is not possible due to equipment failure or maintenamce requirements. Accordingly, persons transmitting documents by fax are cautioned against relying on the availability of this service near the end of response periods or other deadlines.

A fax machine has been installed in the TMEO and in the A/C TM. The corresponding fax and telephone numbers are as follows:

Location	*Fax No.*	*Phone No.*
TMEO	(703) 308-0429	(703) 308-0928
A/C TM	(703) 557-8263	(703) 557-3061

Submissions by facsimile transmission to the TMEO or A/C TM should be transmitted to the location for which they are intended. Fax transmissions regarding trademarks will not be deemed to have been filed in the PTO, and will not be considered, if transmitted to any fax machines other than those identified above.

The Office will not formally acknowlege receipt of documents transmitted by fax. The Office facsimile machine will usually confirm to the sending unit that the transmission is complete.

Effect of Filing by Fax

Certain trademark papers and fees required to be filed in the PTO will be considered filed if they are transmitted to one of the above fax numbers. The date of receipt is the date that the transmission is completed as indicated by the date shown on the Office's facsimile transmission activity report. If that date is a Saturday, Sunday or Federal holiday within the District of Columbia, the document will be considered to be have been filed on the next business day.

Papers transmitted by fax may include a certificate of facsimile transmission, certifying the date of transmission. In the event the facsimile transmitted paper is misplaced or lost in the PTO, a copy of the paper, with Certificate of Facsimile Transmission attached thereto, will be evidence of filing by fax. The Certificate of Facsimile Transmission should be labeled as such and should appear on the paper or include a reference to the registration number or application serial number, and must include the following:

The date of facsimile transmission; and
The signature of the person certifying that the document is being facsimile transmitted on a certain date.

The Certificate of Facsimile Transmission should also include the fax number to which the transmission is directed. The person signing the Certificate should have a reasonable basis to expect that the entire paper will be transmitted by fax on or before the date indicated.

When possible, the Certificate should appear on the paper being transmitted. An example of a preferred Certificate of Facsimile Transmission for use with the paper being transmitted is as follows:

CERTIFICATE OF FACSIMILE TRANSMISSION

I hereby certify that this paper for <reg. or ser. no.> is being facsimile transmitted to the Patent and Trademark Office fax number _____on the date shown below.

_____
Type or print name of person signing certificate

_____ _____
Signature Date

If the Certificate of Facsimile Transmission is presented on a separate paper, it *must* identify the application or registration to which it relates.

In the event that the facsimile transmission is misplaced or lost in the Trademark Office, the submission will be considered filed as of the date of the transmission, if the party who transmitted the paper:

1) Informs the PTO of the previous facsimile transmission promptly after becoming aware that the submission has been misplaced or lost;

2) Supplies another copy of the previously transmitted submission with the Certificate of Transmission; and

3) Supplies a copy of the sending unit's report confirming transmission of the submission in question.

Items one through three above must be supported by an affidavit or declaration under § 2.20. The required evidence should be directed to the area in the Office where the misplaced or lost document was intended to be filed, e.g., the Law Office or Post Registration.

If all criteria above cannot be met, the only remedy available is a petition to the Commissioner comprised of a verified statement which attests on a personal knowledge basis to the previously timely transmission.

The above procedures for establishing that a misplaced or lost submission was filed in the PTO are *not* available for those submissions enumerated as exceptions to the 37 CFR 1.8 Certificate of Mailing procedures.

Requirements for Filing by Fax

- Each facsimile transmitted document must be legible.
- Each transmission should have a cover sheet which includes: the number of pages, and the name, the address, the fax number and the telephone number of the transmitting party.
- The preferred size of the document being transmitted is 8 1/2 inches by 11 inches, letter size or A4 paper. However, in no event will the Office accept a document being transmitted that is larger than 8 1/2 inches by 14 inches.
- Each transmission must be limited to papers relating to a single trademark application or registration. The application serial number, if one has been assigned, or the registration number must be referenced on each page of the transmission. If a serial number has not yet been assigned to an application, each page of the transmission must bear the name of the applicant and an identifier of the mark. The Office strongly recommends that applicants wait, if possible, until a serial number is assigned before filing a related document by fax.
- The document that is used as the original for the facsimile transmission must have an original signature and should be retained by the sender as evidence of the content of the facsimile transmission.

PUBLIC ADVISORY COMMITTEE FOR TRADEMARK AFFAIRS

Agency: Patent and Trademark Office, Comerce
Action: Notice of Committee Charter Amendment
Summary: In accordance with the provisions of the Federal Advisory Committee Act, 5 U.S.C. App. (1976), and after consultation with GSA, it has been determined that an amendment of the charter of the Public Advisory Committee for Trademark Affairs is in the public interest in connection with the performance of duties imposed on the Department by law. The charter amendment was signed on December 3, 1990.

The charter has been amended as follows to: (1) broaden the topics that the Committee may address to include international trademark law, (2) allow the membership of the Committee to be drawn from a wider range of the trademark community rather than soley from the regular, associate and supplementary membership of the United States Trademark Association (USTA), (3) increase the number of members on the Committee fron 15 to 18, (4) provide for the direct selection of the members and appointment of the chairman of the Committee by the Assistant Secretary and Commissioner of Patents and Trademarks rather than by the president of the USTA, and (5) set the term of membership at two years.

For Further Information Contact: Lynne Beresford, Committee Control Officer, Office of the Assistant Commissioner for Trademarks, U.S. Patent and Trademark Office, Washington, D.C. 20231, telephone: (703) 557-7464, or Jan Jivatodi, Committee Management Analyst, U.S. Department of Commerce, Washington, D.C. 20230, telephone: (202) 377-4217.

Suuplementary Information: The Committee was first established in September 1970, and the latest charter renewal was signed on April 4, 1990. The charter amendment was approved on December 3, 1990, and provides for the following:

(1) The amendment broadens the objectives and duties of the Committee to specifically embrace international trademark law. The previous charter permitted the Committee to advise the Patent and Trademark Office only on the steps which could be taken to increase the efficiency and effectiveness of the administration of the Trademark Act and to provide a continuing source of knowledge from the private sector to the Government. Given the increased interest within the trademark community and the Patent and Trademark Office in international trademark law, especially in the Madrid Protocol and harmonization, it is desirable that the charter refer explicitly to international trademark law.

(2) Section 5(b)(2) of the Federal Advisory Committee Act requires that the membership of advisory committees be "fairly balanced in terms of the points of view represented...." The amendment furthers that goal by permitting the membership to be drawn from a wide range of the trademark community including users of the public search room, academia, members of the public at large, and the business community.

(3) The amendment increases the number of members on the Committee from 15 to 18. The increase was needed to permit additional members, from different sectors of the trademark community, to be added to the Committee without having to displace any of the current Committee members.

(4) Section 5(b)(2) of the Federal Advisory Committee Act requires that "the membership be fairly balanced in terms of the points of view represented..." The amendment futhers that goal by permitting the chairman to be appointed, and the members of the Committee to be selected by the Assistant Secretary and Commissioner of Patents and Trademarks.

(5) The charter of the Public Advisory Committee for Trademark Affairs did not set terms for members. In order to promote more orderly administration of the Committee, the amendment sets the terms of the members at two years. Members will serve at the discretion of the Assistant Secretary and Commissioner of Patents and Trademarks. Appointements, when vacancies occur, shall be for the remainder of the unexpired term.

PATENT LAW FOREIGN FILING AMENDMENTS

Agency: Patent and Trademark Office, Commerce
Action: Notice of Final Rulemaking
Summary: The Patent and Trademark Office (Office) is amending the rules of practice in patent cases to implement the Patent Law Foreign Filing Amendments Act of 1988, Subtitle B of Public Law 100-418. The rules reflect changes made to 35 U.S.C. 184 which specify that a license is not required to, file amendments, modifications, and supplements containing additional subject matter to a previously licensed foreign patent application if such amendments, modifications, and supplements do not change the general nature of the invention disclosed in the application in a manner which would require a corresponding United States patent application to be made available for national security inspection under 35 U.S.C. 181. These regulatory changes are applicable to most existing foreign filing license holders if their patent application did not undergo security inspection under 35 U.S.C 181. Also, under the rules, a retroactive foreign filing license may be granted in situations where a proscribed foreign filing occurred through error and without deceptive intent as opposed to the earlier standard of inadvertence.

Effective Date: Feb. 19, 1991.

Supplementary Information: A notice of proposed rulemaking was published in the *Federal Register* at 55 Fed. Reg. 24270-24275 (June 15, 1990) and at 1116 Official Gazette 21-25 (July 10, 1990). No oral hearing was held. Three written comments on the proposed rulemaking were received. The comments received and replies thereto are listed below.

The rules are intended to implement the Patent Law Foreign Filing Amendments Act of 1988, Subtitle B of Public Law 100-418 (hereinafter the Act), which amended §§ 184, 185 and 186 of Title 35, United States Code, in order to simplify the procedures for United States inventors filing and prosecuting patent applications in foreign countries. The Office has not made any rule changes to implement the amendments to 35 U.S.C. 185 or 186 since these changes affect matters outside its jurisdiction.

Section 184 of Title 35 is intended to protect United States national security interests by preventing the disclosure of potentially sensitive inventions made in the United States to foreign nationals by the act of filing a patent application in foreign countries. An inventor may not apply for a foreign patent on an invention made in the United States until at least six (6) months after the inventor has filed a United States patent application unless the inventor receives a license from the Office permitting an earlier foreign filing. This six month period assures the Office the opportunity to screen applications for information the disclosure of which might be detrimental to the national security. Also, § 184, as originally enacted, authorized the Office to grant a retroactive license for an unlicensed foreign filing of a patent application if the foreign filing was inadvertent and if the disclosure of the subject matter in the application would not be detrimental to United States security interests.

The original regulatory implementation of 35 U.S.C. 184 required applicants to obtain a license not only for the original foreign patent application but also for the filing of almost any information in support of the application, thereby creating administrative problems for United States inventors seeking foreign patent protection. For example, foreign patent offices often demand that additional technical data, such as the melting point of a chemical, be added to a patent application. An additional foreign filing license was usually required before the inventor could submit modifications, amendments, or supplements to a previously licensed foreign patent application, regardless of how trivial the change might be.

Recognizing the problems involved in obtaining these additional licenses, the Office promulgated rules in 1984 (see § 5.15(a) and 49 Fed. Reg. 13456 (April 4, 1984)) to streamline the licensing procedure. The 1984 rule change provided that an inventor could obtain in applications, the disclosure of the content of which is not potentially detrimental to United States security interests, a license which permitted the foreign filing of modifications, amendments, and supplements without further licensing if such changes were within the scope or character of the originally licensed invention (§ 5.15(a)). The 1984 rule change, however, could not be made retroactive, and therefore had no effect on licenses granted under the old system. If an applicant wished to broaden a pre-April 4, 1984, foreign filing license to the scope allowed by § 5.15(a), this involved filing a separate petition under § 5.15(c) in each application.

The present Act clarifies the statutory basis for the current Patent and Trademark Office rules by providing that inventors, in most circumstances, are not required to obtain an additional license to file modifications, amendments, and supplements to their foreign applications for which a foreign filing license has been obtained under § 5.15(a). Unlike the previous Office rules, these rules broaden the scope of most existing licenses, provided that the conditions contained in the Act are met.

The Act and these rules also address difficulties associated with attempts to procure a retroactive foreign filing license. Some applicants faced loss of their patent rights due to improper foreign filings even though they believed, in good faith, that a license was not necessary for certain minor changes to their foreign application. Court decisions have held that supplemental information filed abroad was exempt from the license requirement *only* when it was recited *verbatim* in the United States patent application, or was so commonly known that it could have been said to have been expressly disclosed in the United States application. *In re Gaertner*, 604 F.2d 1348, 202 USPQ 714 (CCPA 1979). If a patent applicant did not obtain a foreign filing license from the Office, any corresponding United States patent was at risk of being held invalid under 35 U.S.C. 185 if technical information was added to the foreign application, even if the technical information was completely unrelated to United States security interests.

Loss of United States patent rights subsequent to an "inadvertent" unlicensed foreign filing could be avoided if a retroactive license was obtained under 35 U.S.C. 184. *Twin Disc, Inc. v. United States*, 10 Cl. Ct. 713, 231 USPQ 417 (Ct. Cl. 1986) and *Minnesota Mining and Manufacturing Co. v. Norton Co.*, 366 F.2d 238, 151 USPQ 1 (6th Cir. 1966), *cert. denied*, 385 U.S. 1005 (1967). While the *Gaertner* decision defined a broad range of circumstances under which a foreign filing license would be required, other court decisions made correction of licensing errors difficult by setting forth various strict interpretations of the standard of "inadvertence." *Compare Iron Ore Co. of Canada v. Dow Chemical Co.*, 177 USPQ 34 (D. Utah 1972), *aff'd*, 500 F.2d 189, 182 USPQ 520 (10th Cir. 1974) and *Reese v. Dann*, 391 F. Supp. 12, 185 USPQ 492 (D.D.C. 1975). An inventor could fail to meet the standard of "inadvertence" even if the information disclosed was not significant in nature and did not contain any sensitive national security information. For example, one decision suggested that the filing of information abroad was intentional because the inventor first considered the applicability of § 184. *Shelco, Inc. v. Dow Chemical Co.*, 322 F. Supp. 485, 168 USPQ 395 (N.D. Ill. 1970), *aff'd*, 466 F.2d 613, 173 USPQ 451 (7th Cir. 1972), *cert. denied*, 409 U.S. 876 (1972). Under the *Shelco* standard, if supplemental information had been filed abroad as a considered, willful act, even though done through error in the belief that the information disclosed abroad did not exceed the scope of the disclosure in the United States patent application, the filing would not be "inadvertent"; and, therefore, the subject information could not qualify for a retroactive license.

The Act addresses these problems, and the rules implement the intention of the Act. The Act changes the language of the statute to provide that an inventor may receive a retroactive license if the inventor can show that the premature filing of a foreign patent application, or the submission of supplemental information in support of a foreign patent application, was made "through error and without deceptive intent." This criterion is equivalent to that for reissue of a patent under 35 U.S.C. 251 to correct errors made without any deceptive intention. The reissue error requirement has been considered by the courts. See, e.g., *In re Weiler*, 790 F.2d 1576, 229 USPQ 673 (Fed. Cir. 1986) and *In re Wadlinger* 496 F.2d 1200, 181 USPQ 826 (CCPA 1974). The applicant for a retroactive license also must show that the foreign filing did not disclose any information detrimental to the national security and that diligence was exercised in seeking a retroactive license once the applicant became aware of the proscribed foreign filing.

The Act became effective on August 23, 1988, but it does not affect any final decision made by the Office or a court, nor the rights or liabilities of any party under a patent in a case pending before a court on the above date or under any subsequent patent deriving priority rights from such patent under 35 U.S.C. 120 or 121. Therefore, the retroactive effect of the Act and the rules is limited.

Comments on the Proposed Rules

Comment

One comment stated that the discussion in the proposed rulemaking of the modification of the standard for obtaining a retroactive license from inadvertence to "through error and without deceptive intent" should have included a reference to *In re Wadlinger*, 492 F.2d 1200, 181 USPQ 826 (CCPA 1974) rather than to *In re Weiler*, 790 F.2d 1576, 229 U8PQ 673 (Fed. Cir. 1986) The comment stated that *Wadlinger* was a more appropriate and illustrative case because it discusses more fully the meaning of the term "error" as encompassing "inadvertence, accident or mistake" and as having a very broad meaning. The comment also noted that *Wadlinger* was referenced in comments made in the hearing on the proposed legislation as indicative of the reissue standard being applied to retroactive license requests

Reply

A citation to *In re Wadlinger* has been added to the citation of *In re Weiler* in the discussion of the final rules. It was not the intent of the Office by citing the *Weiler* case to suggest that decisions on petitions for the grant of retroactive licenses would be limited by that case. Decisions are based on the particular facts in each case and the entire body of law with respect to the standard of "through error and without deceptive intent."

Comment

A comment stated that the Office should provide additional examples in the explanatory text in the final rule as to changes that may be made to foreign applications that have been licensed under 37 CFR 5.15(a) without obtaining any additional license. The comment pointed out that examples were given in the 1984 rulemaking.

Reply

The list of examples presented at the time that 37 CFR 5.15(a) was adopted in 1984 was not intended to be all-inclusive. The Office is not aware of any judicial decisions setting limits to

VOL 1123 ISS 2 FEB 12 1991 UMI

changes that may be made under a § 5.15(a) license. Depending on the nature and the criticality, changes in temperature, portions, size, etc., outside of a previously disclosed value or range that do not change the general nature of the invention from what was previously disclosed are within the scope of a § 5.15(a) license. However, if the newly disclosed value or range does change the general nature of the invention from that of the originally disclosed value or range, then a separate license is required. Likewise, new species or subcombinations of a previously disclosed genus or combination would appear to require an additional license to include such a change in a foreign application.

Comment

One comment stated that the Office should provide clarification of the attorney's ability to make decisions as to whether or not the added subject matter, in his opinion, changes the general nature of the invention.

Reply

Not only does the attorney have the ability to make the decision as to whether or not the additional subject matter changes the general nature of the invention, the attorney has the responsibility to do so. The Office will not give advisory opinions on whether an additional license is necessary, and will treat any provisional requests for a prospective or retroactive license as a request for a license. The procedure of the Office resolving any questions as to the security inspection status of any changes to previously licensed material is intended to apply only to those changes that have been submitted to the Office, i.e., the Office will reply to any inquiry as to whether previously submitted subject matter underwent, or should have undergone, security review.

Comment

One comment questioned what would happen if an attorney on considered judgment, honestly believed that a supplement did not change the general nature of a licensed invention, but that judgment later proved to be erroneous.

Reply

The Act and the rules now provide for a retroactive license to be granted in situations where it can be shown that a filing was made without a license through error and without deceptive intent. Thus, a retroactive license could be sought under § 5.25.

Discussion Of Specific Rule Changes

Section 5.11(a), as amended, specifies when a license is required before filing any foreign application for patent, including any modifications, amendments and supplements or divisions thereof. Section 5.11(a) adopts the statutory definition of "application" in 35 U.S.C. 184. Also, the rule, as amended, clarifies that the provisions of this section apply only to inventions made in the United States as stated in 35 U.S.C. 184. However, where an improvement or modification to a foreign-origin invention is made in the United States, a license would be required for the additional subject matter. The language proposed for § 5.11(e)(3) has been redrafted for clarity but still provides that an inventor need not obtain a supplemental license to file modifications, amendments and supplements containing subject matter not disclosed in, or divisions of, a foreign application for which an initial foreign filing license was not required, as long as the corresponding United States application was not required to be made available for inspection under 35 U.S.C. 181 and § 5.1 and the changes did not alter the general nature of the invention in a manner which would require the United States application to have been made available for inspection under 35 U.S.C. 181 and § 5.1. The need for a supplemental license depends on whether the changes altered the general nature of the invention, rather than the label applied to the changes, i.e., "Continuation", "Continuation In-Part", "Division", etc.

Authorized parties may determine whether a particular application was forwarded to the defense agencies for inspection under 35 U.S C. 181 either by reviewing the filing receipt to determine if a license is or was granted, in which case security inspection did not occur, or by reviewing the file wrapper to determine if an access acknowledgment under 35 U.S.C. 181 is present, in which case security inspection did occur. If verification of the security inspection status of an application is needed, the authorized parties may submit a written request therefor to the Office, directed to the attention of Licensing and Review. A written response from the Office will be issued. In the event Office records are not available, a *de novo* determination by the Office will be made of the need for defense agency inspection under the present national security standards. If security inspection was not required under 35 U.S.C. 181, then the provisions of the Act will convert a previously granted or implied license into one having the scope of proposed § 5.15(a).

Section 5.15(a), as amended, adopts the specific provisions of the Act and clarifies the existing rules by expressly stating that the license provisions of the paragraph are applicable to United States applications which were not required to be made available for inspection under 35 U.S.C. 181 and § 5.1. The inspection provisions of 35 U.S.C. 181 delegate to the Commissioner of Patents and Trademarks the authority to decide which applications will be forwarded to United States defense agencies for national security inspection when the Government has no property interest in the invention. The fact that an application was forwarded to the defense agencies does not necessarily mean that the application was properly within the inspection scope of 35 U.S.C. 181. Thus, if an application was not required to be inspected but was inspected by mistake, it is eligible for such a license. The changes to the regulation expressly apply to modifications, amendments, and supplements to a previously licensed foreign application, and divisions thereof, provided the changes do not alter the general nature of the invention in a manner which would require a corresponding United States application to have been made available for inspection under 35 U.S.C. 181.

The language of § 5 15(a)(1) also has been clarified. If the filing of the foreign application was pursuant to a license granted under § 5.15 and issued prior to publication of the notice in the Federal Register at 49 Fed. Reg. 13456 (April 4, 1984) for subject matter which was not appropriate for inspection under 35 U.S.C. 181, the license is now expanded to cover amendments, modifications, and supplements thereto, or divisions thereof, which do not change the general nature of the invention in a manner which would require such application to be made available for security inspection under 35 U.S.C. 181. Also, paragraphs (a)(3) and (a)(4) of § 5.15 have been merged in order to more clearly define the type of subsequent changes to a previously licensed foreign patent application which may be filed without any additional license. In particular, it is made clear that these changes must not be such as to require the application to be made available for security inspection. Any questions about the security inspection status of any application or amendments, modifications, and supplements thereto, or divisions thereof, will be handled in the manner as described above.

Section 5.15(b), as amended, clarifies the existing rule by expressly stating that the license provisions of § 5.12(b) are applicable to United States applications which were required to be made available for inspection under 35 U.S.C. 181 and § 5.1. The amendments also clarify the language of the paragraph and indicate that the more restrictive license under this paragraph includes authority to take actions in the foreign or international application, provided subject matter additional to that covered by the license is not involved Section 5.15(c), as amended, clarifies the existing rule by expressly stating that the granting of a § 5.15(a) scope to a license under § 5.15(b) and conversion provisions of this paragraph are only applicable to material submitted under § 5.13 or United States applications, which are not, or were not, required to be made available for inspection under 35 U.S.C. 181 and § 5.1.

Sections 5.15(e) and (f), as amended, substitute a reference to § 5.15(a)(3) rather than to § 5.15(a)(4) which has been eliminated as a separate paragraph. Paragraph (e) also has been amended to state that changes to the general nature of the invention, which would require the application to have been made available for inspection under 35 U.S.C. 181 and § 5.1, require a separate license.

Section 5.25(a), as amended, provides that the inventor may receive a retroactive license if the inventor can show that the premature filing of papers in a foreign patent office was made through error and without deceptive intent. This criterion is the same as that for "error without any deceptive intention" for reissue of a patent and replaces the previous standard of inadvertence. This section also has been amended to clarify that each country in which a proscribed filing occurred must be listed in a petition for retroactive license. Also, the rule has been amended to define a verified statement as being in the form of either an oath or a declaration. Finally, the rule has been clarified by defining the period over which error without deceptive intent must be shown as being the time leading up to and including the proscribed foreign filing.

Other Considerations

The rule change is in conformity with the requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, Executive Orders 12291 and 12612, and the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

The General Counsel of the Department of Commerce has certified to the Acting Chief Counsel for Advocacy, Small Business Administration, that the rule change will not have a significant adverse economic impact on a substantial number of small entities (Regulatory Flexibility Act, 5 U.S.C. 605(b)) because the rules simplify the procedures for all United States inventors who file and prosecute applications in foreign countries.

The Patent and Trademark Office has determined that this rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than $100 million. There will be no major increase in costs or prices for consumers, individuals, industries, Federal, state or local government agencies, or geographic regions. There will be no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Patent and Trademark Office has also determined that this notice has no Federalism implications affecting the relationship between the National Government and the States as outlined in Executive Order 12612.

These rules contain a collection of information requirement subject to the Paperwork Reduction Act which has previously been approved by the Office of Management and Budget under Control No. 0651-0011 with an expiration date of March 31, 1993. The average time for each petition for license under § 51.12(b) or § 5.25 is estimated to be approximately thirty (30) minutes, including time for reviewing instructions, gathering and maintaining data needed, and completing and reviewing the petition submission. Send comments regarding this burden estimate to the Patent and Trademark Office, Office of Management and Organization, Washington, D.C. 20231, and the Office of Management and Budget, Washington, D.C. 20503 (Attention: Paperwork Reduction Project 0651-0011).

37 CFR Part 5
Classified information, Exports, Foreign relations, Inventions and patents.

For the reasons set forth in the preamble, 37 CFR Part 5 is amended as set forth below.

PART 5 - SECRECY OF CERTAIN INVENTIONS AND LICENSES TO EXPORT AND FILE APPLICATIONS IN FOREIGN COUNTRIES

1. The authority citation for Part 5 is revised to read as follows:

Authority: 35 U.S.C. 6, 41, 181-188, as amended by the Patent Law Foreign Filing Amendments Act of 1988, Pub. L. 100-418 102 Stat. 1567; the Arms Export Control Act, as amended, 22 U.S.C. 2751 *et seq.*, the Atomic Energy Act of 1954, as amended, 42 U.S.C. 2011 *et seq.*, and the Nuclear Non-Proliferation Act of 1978, 22 U.S.C. 3201 *et seq.*, and the delegations in the regulations under these acts to the Commissioner (15 CFR 370.10(j), 22 CFR 125.04, and 10 CFR 810.7).

2. Section 5.11, paragraphs (a) and (e), are revised to read as follows:

§ 5.11 License for filing in a foreign country an application on an invention made in the United States or for transmitting an international application.

(a) A license from the Commissioner of Patents and Trademarks under 35 U.S.C. 184 is required before filing any application for patent including any modifications, amendments, or supplements thereto or divisions thereof or for the registration of a utility model, industrial design, or model, in a foreign patent office or any foreign patent agency or any international agency other than the United States Receiving Office, if the invention was made in the United States and:

(1) An application on the invention has been on file in the United States less than six months prior to the date on which the application is to be filed, or

(2) No application on the invention has been filed in the United States.

* * * * *

(e) No license pursuant to paragraph (a) of this section is required:

(1) If the invention was not made in the United States, or

(2) If the corresponding United States application is not subject to a secrecy order under § 5.2, and was filed at least six months prior to the date on which the application is filed in a foreign country, or

(3) For subsequent modifications, amendments and supplements containing additional subject matter to, or divisions of, a foreign patent application if:

(i) a license is not, or was not, required under paragraph (e)(2) of this section for the foreign patent application;

(ii) the corresponding United States application was not required to be made available for inspection under 35 U.S.C. 181 and § 5.1; and

(iii) such modifications, amendments, and supplements do not, or did not, change the general nature of the invention in a manner which would require any corresponding United States application to be or have been available for inspection under 35 U.S.C. 181 and § 5.1.

* * * * *

3. Section 5.15, paragraphs (a), (b), (c), (e) and (f), are revised to read as follows:

§ 5.15 Scope of license.

(a) Applications or other materials reviewed pursuant to §§ 5.12 through 5.14, which were not required to be made available for inspection by defense agencies under 35 U.S.C. 181 and § 5.1, will be eligible for a license of the scope provided in this paragraph. This license permits subsequent modifications, amendments, and supplements containing additional subject matter to, or divisions of, a foreign patent application, if such changes to the application do not alter the general nature of the invention in a manner which would require the United States application to have been made available for inspection under 35 U.S.C. 181 and § 5.1. This license also covers the inventions disclosed in foreign applications which had been granted a license under this part prior to April 4, 1984, and which were not subject to security inspection under 35 U.S.C. 181 and § 5.1. Grant of this license authorizes the export and filing of an application in a foreign country or the transmitting of an international application to any foreign patent agency or international patent agency when the subject matter of the foreign or international application corresponds to that of the domestic application. This license includes authority:

(1) To export and file all duplicate and formal application papers in foreign countries or with international agencies;

(2) To make amendments, modifications, and supplements, including divisions, changes or supporting matter consisting of the illustration, exemplification, comparison, or explanation of subject matter disclosed in the application; and

(3) To take any action in the prosecution of the foreign or international application provided that the adding of subject matter or taking of any action under paragraphs (a)(1) and (2) of this section does not change the general nature of the invention disclosed in the application in a manner which would require such application to have been made available for inspection under 35 U.S.C. 181 and § 5.1 by including technical data pertaining to:

(i) Defense services or articles designated in the United States Munitions List applicable at the time of foreign filing, the unlicensed exportation of which is prohibited pursuant to the Arms Export Control Act, as amended, and 22 CFR Parts 121 through 130; or

VOL 1123 ISS 2 FE 12 1991 UMI

(ii) Restricted Data, sensitive nuclear technology or technology useful in the production or utilization of special nuclear material or atomic energy, the dissemination of which is subject to restrictions of the Atomic Energy Act of 1954, as amended, and the Nuclear Non-Proliferation Act of 1978, as implemented by the regulations for Unclassified Activities in Foreign Atomic Energy Frograms, 10 CFR Part 810, in effect at the time of foreign filing.

(b) Applications or other materials which were required to be made available for inspection under 35 U.S.C. 181 and § 5.1 will be eligible for a license of the scope provided in this paragraph. Grant of this license authorizes the export and filing of an application in a foreign country or the transmitting of an international application to any foreign patent agency or international patent agency. Further, this license includes authority to export and file all duplicate and formal papers in foreign countries or with foreign and international patent agencies and to make amendments, modifications, and supplements to, file divisions of, and take any action in the prosecution of the foreign or international application, provided subject matter additional to that covered by the license is not involved.

(c) A license granted under § 5.12(b) pursuant to § 5.13 or § 5.14 shall have the scope indicated in paragraph (a) of this section, if it is so specified in the license. A petition, accompanied by the required fee (§ 1.17(h)), may also be filed to change a license having the scope indicated in paragraph (b) of this section to a license having the scope indicated in paragraph (a) of this section. No such petition will be granted if the copy of the material filed pursuant to § 5.13 or any corresponding United States application was required to be made available for inspection under 35 U.S.C. 181 and § 5.1. The change in the scope of a license will be effective as of the date of the grant of the petition.

* * * * *

(e) Any paper filed abroad or transmitted to an international patent agency following the filing of a foreign or international application which changes the general nature of the subject matter disclosed at the time of filing in a manner which would require such application to have been made available for inspection under 35 U.S.C. 181 and § 5.1 or which involves the disclosure of subject matter listed in paragraphs (a)(3)(i) or (ii) of this section must be separately licensed in the same manner as a foreign or international application. Further, if no license has been granted under § 5.12(a) on filing the corresponding United States application, any paper filed abroad or with an international patent agency which involves the disclosure of additional subject matter must be licensed in the same manner as a foreign or international application.

(f) Licenses separately granted in connection with two or more United States applications may be exercised by combining or dividing the disclosures, as desired, provided:

(1) Subject matter which changes the general nature of the subject matter disclosed at the time of filing or which involves subject matter listed in paragraphs (a)(3)(i) or (ii) of this section is not introduced, and

(2) In the case where at least one of the licenses was obtained under § 5.12(b), additional subject matter is not introduced.

* * * * *

4. Section 5.25, paragraph (a), is revised to read as follows:

§ 5.25 Petition for retroactive license

(a) A petition for a retroactive license under 35 U.S.C. 184 shall be presented in accordance with § 5.13 or § 5.14 (a), and shall include:

(1) A listing of each of the foreign countries in which the unlicensed patent application material was filed,

(2) The dates on which the material was filed in each country,

(3) A verified statement (oath or declaration) containing:

(i) An averment' that the subject matter in question was not under a secrecy order at the time it was filed abroad, and that it is not currently under a secrecy order,

(ii) A showing that the license has been diligently sought after discovery of the proscribed foreign filing, and

(iii) An explanation of why the material was filed abroad through error and without deceptive intent without the required license under § 5.11 first having been obtained, and

(4) The required fee (§ 1.17(h)).

The above explanation must include a showing of facts rather than a mere allegation of action through error and without deceptive intent. The showing of facts as to the nature of the error should include statements by those persons having personal knowledge of the acts regarding filing in a foreign country and should be accompanied by copies of any necessary supporting documents such as letters of transmittal or instructions for filing. The acts which are alleged to constitute error without deceptive intent should cover the period leading up to and including each of the proscribed foreign filings

SPECIAL BOXES FOR MAIL

Special PTO mail box numbers should be used to allow forwarding of particular types of mail to the appropriate areas as quickly as possible. Such mail is forwarded directly to the appropriate area without being opened. Only the specified type of document should be placed in an envelope addressed to one of these boxes. If any documents other than the specified type identified for each box are addressed to that box, they will be delayed in reaching the appropriate area for which they are intended.

The following special boxes should be used only for their specified purpose. Address mail as follows:

Box _____
Commissioner of Patents and Trademarks
Washington, D.C. 20231

Box 3	Mail for the Office of personel for NFC
Box 4	Mail for the Assistant Commissioner for External Affairs and the Office of Legislation and Internal Affairs.
Box 5	"No Fee" mail related to trademarks.
Box 6	Mail for the Office of Procurement

Reference Collection of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

Plant Patents ..... 3,413 to 3,462 inclusive

MARKS PUBLISHED FOR OPPOSITION

The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. Opposition under section 13 may be filed within thirty days of the date of this publication. See rules 2.101 to 2.105.

A separate fee of two hundred dollars for opposing each mark in each class must accompany the opposition.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

TRADEMARK REGISTRATIONS AMENDED, CORRECTED, ETC.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

Any change to the registration will be indicated at the bottom of each entry under ELEMENTS AMENDED, CORRECTED OR RESTRICTED. With the exception of changes to the goods and services, additions to the registration will appear in asteriaks and deletions of the registration will appear in brackets. Elements which are only changed will be listed with no punctuation. As to the goods/services statement, amendments to the goods/services will appear in asterisks and deletions will appear in brackets. In addition if any change to the goods/services occurs, the element "Goods/Services" will be listed under ELEMENTS AMENDED, CORRECTED OR RESTRICTED.

PATENT AND TRADEMARK OFFICE NOTICES

Patent Cooperation Treaty (PCT) Information

For information concerning the PCT member countries see the notice appearing in the *Official Gazette* at 1120 O.G. 14 on Nov. 27, 1990.

For use of the European Patent Office as an International Searching Authority for international applications filed in the United States Receiving Office, see the notice appearing in the *Official Gazette* at 1022 O.G. 52 on Sept. 28, 1982.

For use of the European Patent Office as an International Preliminary Examining Authority for international applications filed in the United States Receiving Office, see the notices appearing in the *Official Gazette* at 1080 O.G. 2 on July 7, 1987 and at 1091 O.G. 2 on June 7, 1988. There is no longer a limit on the number of such international applications accepted for international preliminary examination by the European Patent Office; see the notice appearing at 1116 O.G. 32, on July 17,1990.

The search fee of the European Patent Office was changed due to a difference in the amount of the fee in German Marks and the exchange rate of the U.S. dollar in relation to the German Mark as of Jan. 3, 1991, and was announced in the *Official Gazette* at 1122 O.G. 566 on Jan 1, 1991.

International fees were changed on September 1, 1990 due to a difference in the exchange rate of the U.S. dollar in relaton to the Swiss Franc and were announced in the *Official Gazette* at 1116 O.G. 32 on July 17, 1990.

Certain domestic PCT fees and charges for International Search and Preliminary Examination have been changed effective Apr. 17, 1989 and were announced in the *Official Gazette* at 1100 O.G. 24 on Mar. 7, 1989.

Dec. 6, 1990

HARRY F. MANBECK, Jr.
Assistant Secretary and Commissioner of Patents and Trademarks.

Notice of Maintenance Fees Payable

Title 37, Code of Federal Regulations, Section 1.362(d), effective Nov. 1, 1984, provides that maintenance fees may be paid without surcharge for a six-month period beginning 3, 7, and 11 years after the date of issue of patents based on application filed on or after Dec. 12, 1980. An additional six-month grace period is provided by 35 U.S.C. 41(b) and 37 CFR 1.362(e) for payment of the maintenance fee with the surcharge set forth in 37 CFR 1.20(k) or (l), as amended effective Apr. 17, 1989. If the maintenance fee is not paid in a patent requiring such payment the patent will expire on the 4th, 8th or 12th anniversary of the patent.

Attention is drawn to the patents which were issued on February 16, 1988 for which maintenance fees due at 3 years and six months may now be paid. The patents have patent numbers within the following ranges:

Utility Patents 4,724,546 through 4,726,073
Reissue Patents based on the above identified patents.

Attention is drawn to the patents which were issued on February 14, 1984 for which maintenance fees due at 7 years and six months may now be paid. The patents have patent numbers within the following ranges:

Utility Patents 4,4230,759 through 4,432,098
Reissue Patents based on the above identified patents.

No maintenance fees are required for design or plant patents.

Payments of maintenance fees in patents should be directed to "Commissioner of Patents and Trademarks, Box M. Fee, Washington, D.C. 20231."

The current amounts of the maintenance fees due at 3 years and six months and seven years and six months are set forth in 37 CFR 1.20(e), and (f), as amended Nov. 5, 1990, which are reproduced below:

37 CFR § 1.20 Post-issuance fees and surcharges

"(e) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after Dec. 12, 1980 and before Aug. 27, 1982, in force beyond 4 years; the fee is due by three years and six months after the original grant.....$245.00

"(f) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after Dec. 12, 1980 and before Aug. 27, 1982, in force beyond 8 years; the fee is due by seven years and six months after the original grant.....$495.00"

"(h) For maintaining an original or reissue patent except a design or plant patent, based on an application filed on or after Aug. 27,1982, in force beyond 4 years; the fee is due by three years and six months after the original grant:

By a small entity (§1.9(f)).....$415.00
By other than a small entity.....$850.00"

"(i) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after Aug. 27, 1982, in force beyond 8 years; the fee is due by seven years and six months after the original grant:

By a small entity (§1.9(f)).....$835.00
By other than a small enttity.....$1670.00"

The amounts of the surcharges for paying the maintenance fee during the grace period or after the expiration of the patent are set forth in 37 CFR 1.20(k), (l) and (m), which are reproduced below:

"(k) Surcharge for paying a maintenance fee during the 6-month grace period following the expiration of three years and six months , seven years and six months, and eleven years and six months after the date of the original grant of a patent based on an application filed on or after Dec. 12, 1980 and before Aug. 27,1982.....$120.00"

"(l) Surcharge for paying a maintenance fee during the 6-month grace period following the expiration of three years and six months, seven years and six months, and eleven years and six months after the date of the original grant of a patent based on an application filed on or after Aug. 27, 1982:

By a small entity(§1.9(f)).....$60.00
By other than a small entity.....$120.00"

"(m) Surcharge for accepting a maintenance fee after expiration of a patent for non-timely payment of a maintenance fee where the delay is shown to the satisfaction of the Commissioner to have been unavoidable.....$550.00"

Notice of Expiration of Patents Due to Failure to Pay Maintenance Fees

35 U.S.C. 41 and 37 CFR 1.362(g) provide that if the required maintenance fee and any applicable surcharge are not paid in a patent requiring such payment, the patent will expire at the end of the 4th, 8th, or 12th anniversary of the grant of the patent depending on the first maintenance fee which was not paid.

According to the records of the Office, the patents listed below have expired due to failure to pay the required maintenance fee and any applicable surcharge.

INTERLOCUTORY DECISIONS BY THE TRADEMARK TRIAL AND APPEAL BOARD

Only final decisions of the Trademark Trial and Appeal Board are subject to judicial review. Some confusion may exist in *inter partes* trademark proceedings as to whether certain decisions of the Board are "final" for purpose of judicial review.

An example where confusion may arise is a case in which (1) an opposition is filed, (2) applicant counterclaims for cancellation of a registration relied upon by an opposer, and (3) the Board renders a decision (generally on summary judgment) on the opposition, but sets the counterclaim for trial. Under these circumstances, there is no final order of the Board, because a decision has not been entered on the counterclaim.

The party losing the opposition may feel compelled to seek judicial review within two months of the Board's decision to "preserve" its rights. But such an appeal appears to be premature under *Copelands' Enterprises, Inc. v. CNV, Inc.*, 887 F.2d 1065, 12 USPQ2d 1563 (Fed. Cir. 1989) (in banc). *Copelands* is not the only appeal which has been dismissed because it was taken from an interlocutory decision of the Board. *See Cortex Corporation v. W.L. Gore & Associates, Inc.*, No. 91-1016 (Fed. Cir. January 14, 1991) (unpublished), and *Kellogg Co. v. Pack'Em Enterprises, Inc.*, No. 90-1336 (Fed. Cir. Sept. 27, 1990) (unpublished).

In an effort to (1) minimize disruption in proceedings pending before the Board, (2) eliminate unnecessary appeals and filing of civil actions, only to have the appeal or civil action dismissed as premature, and (3) provide some certainty to parties and their attorneys as to when an appeal is timely, the Board will, when resolving a merits issue prior to final judgment, generally indicate that it has entered an "interlocutory" order in the proceeding and further sets the tie for seeking judicial review of the "interlocutory" order to expire two months from the date a final order is entered in the proceeding.

NOTICE OF EXAMINATION FOR REGISTRATION WEDNESDAY, AUGUST 21, 1991

Pursuant to the provisions of 37 CFR §§10.5, 10.6 and 10.7, an examination for persons seeking registration before the United States Parent and Trademark Office as patent attorneys and agents will be held on Wednesday, AUGUST 21, 1991. The deadline for filing applications along with the $270.00 examination fee and *all* necessary showings required by 37 CFR §10.7(a) and (b) is May 31, 1991.

With the exception of those persons who actively served four years or more in the examining corps of the United States Patent and Trademark Office for whom the examination may be waived, all persons who wish to become recognized to practice before the United States Patent and Trademark Office in patent cases must, pursuant to the above noted rules, pass the examination. Note that passing the examination does not qualify one for recognition for practice before the Patent and Trademark Office in trademark cases. Such recognition is governed by 37 CFR §10.14 which does not require the passing of an examination.

There is no limit on the number of times the registration examination may be taken. The examination consists of two parts, a morning section and an afternnon section. To pass the examination, an applicant must pass both sections. An applicant who passes one section of the examination, but who fails the other section, will not be required to retake the section passed, *provided* the applicant takes and passes the section failed in one of the next three examinations regularly scheduled by the Patent and Trademark Office. If the applicant does not pass the section failed in one of the next three examinations scheduled, the applicant must retake both sections of the examination. No extensions of time will be granted except in extraordinary circumstances, e.g., an accident or hospitalization just prior to the examination which prevented the applicant from taking the examination.

Application forms may be obtained from the Office of Enrollment and Discipline, Suite 810, Crystal Park One, 2011 Crystal Park Drive, Arlington, Va., or my mail address to U. S. Patent and Trademark Office, Box OED, Washington, D. C. 20231.

Iraqi Sanctions Regulations

On January 18, 1991, the Department of the Treasury, Office of Foreign Assets Control (OFAC), published the Iraqui Sanctions Regulations (Regulations) (31 CFR Part 575). 56 Fed. Reg. 2112. The regulations implement Executive Orders 12722 (August 2, 1990) and 12724 (August 9, 1990) relating to certain property and transactions in which the Government of Iraq and persons in Iraq may have an interest.

It appears that the provisions of the Executive Orders and Regulations prohibit transactions relating to the filing or prosecution of applications for patents or for registration of trademarks, where an Iraqi interest is involved. The prohibited transactions, however, may be authorized by a specific license issued pursuant to the procedures described in Section 575.801 of Subpart H of the Regulations.

This notice is intended to alert practitioners and applicants to the prohibitions which may apply to matters before the Patent and Trademark Office ,(PTO) if Iraqi interests are involved. This notice is further intended to advise that where such interests or potential interests come to the attention of the PTO, an appropriate specific license from OFAC may be required.

SPECIAL BOXES FOR MAIL

Special PTO mail box numbers should be used to allow forwarding of particular types of mail to the appropriate areas as quickly as possible. Such mail is forwarded directly to the appropriate area without being opened. Only the specified type of document should be placed in an envelope addressed to one of these boxes. If any documents other than the specified type identified for each box are addressed to that box, they will be delayed in reaching the appropriate area for which they are intended.

The following special boxes should be used only for their specified purpose. Address mail as follows:

Box _____
Commissioner of Patents and Trademarks

Reference Collection of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

MARKS PUBLISHED FOR OPPOSITION

The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. Opposition under section 13 may be filed within thirty days of the date of this publication. See rules 2.101 to 2.105.

A separate fee of two hundred dollars for opposing each mark in each class must accompany the opposition.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

FOR WELDING FIXTURES, ELECTRIC WELDING MACHINES AND SOLDERING MACHINES; ELECTRIC IRONING MACHINES; TRANSMITTING TUBES, ANTENNAS; COMPUTERS, MICROPROCESSORS, ELECTRONIC DATA PROCESSING APPARATUS COMPRISING VISUAL DISPLAY UNITS AND PRINTERS; MAGNETIC RECORDING CHARTS, COMPUTER PROGRAMS; FIRE EXTINGUISHERS; THYRISTORS, TRANSISTORS, DIODES, ELECTRIC CONVERTERS, TRIACS AND HYBRID CIRCUITS, ELECTRIC POWER CONVERTERS, STATIC CONVERTERS, TRANSFORMERS; MAGNETS; ELECTRIC RESISTORS; TERMINALS, SWITCHES, CONTACTS AND INTERRUPTERS; ELECTRIC SWITCHES AND TRIPPING UNITS, ELECTRIC SWITCHBOARDS AND SWITCHGEAR, ELECTRIC RELAYS AND INSULATORS AND ENCLOSURES FOR THE SAME; ELECTRIC CAPACITORS, SYNCHRONOUS CAPACITORS; SURGE ARRESTERS, ELECTRICAL CONTACT SEPARATING UNITS, ELECTRIC REACTORS, SHUNT REACTORS; CURRENT COLLECTORS, TAP CHANGERS FOR ELECTRIC TRANSFORMERS; ELECTRIC SOCKETS AND BUSHINGS; BATTERY CHARGERS AND BATTERY CHARGE CHECKING AND MEASURING UNITS; ELECTRIC PROTECTIVE RELAYS, CABLE TERMINAL BOXES, CABLE JUNCTION BOXES; ELECTRICAL FUSES, AMMETERS, LIGHTNING ARRESTERS, ELECTRIC SIGNAL BOXES; ACOUSTIC AND OPTICAL SIGNALLING UNITS, ANNUNCIATORS, OPTICAL STAFF LOCATING UNITS, TELEPHONES AND CONNECTORS FOR TELEPHONE SYSTEMS, RADIO AND TELEPHONE LOUDSPEAKERS; ACCUMULATORS; FUEL CELLS AND BATTERIES; ELECTRICAL INDICATING AND WARNING UNITS; SOLID-STATE INTEGRATED ELECTRONIC CIRCUITS; OPTOELECTRONIC UNITS; FIBRE-OPTIC CABLES AND LIGHT AND IMAGE CONDUITS; PHOTOCELLS; HIGH-VOLTAGE DIRECT-CURRENT TRANSMISSION UNITS; SWITCHGEAR AND CONTROLGEAR; ELECTRONIC DYNAMOMETERS AND TORQUEMETERS, ELECTRONIC LOAD INDICATORS; ELECTRIC IRONS, VACUUM CLEANERS AND FLOOR POLISHERS; NUCLEAR REACTORS; STATIC RECTIFIERS; STATIC INVERTERS; CAPACITOR BANKS; MAGNETOELASTIC LOAD CELLS, ELECTRONIC SCALES; ELECTRONIC FORCE AND TORQUE MEASURING APPARATUS; ELECTRONIC LOAD INDICATORS; ELECTRICAL AND ELECTRONIC TRANSDUCERS, TRANSMITTERS, DETECTORS, DISPLAY TERMINALS, REGULATORS AND CONTROLLERS; CONTROL EQUIPMENT FOR ELECTRICAL GENERATING STATIONS, ELECTRICAL AND ELECTRONIC TRANSDUCERS, TRANSMITTERS, DETECTORS, REGULATORS, AND CONTROLLERS FOR CONTROLLING AND SUPERVISING ELECTRIC POWER GENERATION, ELECTRIC POWER TRANSMISSION, ELECTRIC POWER DISTRIBUTION, INDUSTRIAL PROCESSES AND THE OPERATION OF VEHICLES; DISPLAY TERMINALS AND COMPUTERS FOR CONTROLLING AND SUPERVISING ELECTRIC POWER DISTRIBUTION AND INDUSTRIAL PROCESSES; OPTOELECTRONIC SENSORS; ELECTRICAL HIGH VOLTAGE DIRECT CURRENT POWER TRANSMISSION UNITS; ELECTRICAL SYNCHRONOUS CONDENSORS; ELECTRICAL BUSHINGS; INDUCTION STIRRERS FOR USE WITH METALLIC MELTS; ELECTRICAL SENSING, SIGNAL PROCESSING AND ELECTRICAL CONTROL AND REGULATING CIRCUITS AND MACHINES FOR CONTROLLING ENGINES, TURBINES, POWER PLANTS AND INDUSTRIAL PROCESSES; ELECTRIC SAFETY FUSE CUTOUTS FOR GENERATORS; CONTROL PANELS, CONTROL DESKS AND CONTROL DESK SWITCHBOARDS; DIGITAL AND ANALOG CIRCUITS AND APPARATUS FOR DATA PROCESSING; EQUIPMENT AND INSTALLATIONS FOR POWER SYSTEM PROTECTION - NAMELY ARC SUPPRESSION COILS, RELAYS AND CONTACTORS; ISOLATORS, FUSES, CIRCUIT BREAKERS; COUNTERS AND SWITCHES OF ALL SIZES FOR VARIOUS INDUSTRIAL APPLICATIONS; FUSE GEAR AND RELAY TESTERS; ELECTRICAL METERS FOR LABORATORY AND INDUSTRIAL USE; ELECTRICAL RECTIFIERS, INVERTERS, FREQUENCY CONVERTERS, COMPENSATORS, PHASE SHIFTERS, CONTACTS AND STATIC CONVERTERS; ELECTRICAL CHARGING APPARATUS; ELECTRICAL BATTERIES; ELECTRICAL CONTROL CIRCUITS FOR TRACTION VEHICLES; AUDIO AND VISUAL ALARM INDICATORS; SWITCHBOARDS CIRCUITS; FURNACE AND AIR CONDITIONER CONTROLS; RADIO TRANSMITTERS FOR SHIPS AND COASTAL RADIO STATIONS; TRANSMITTING AND RECTIFYING TUBES; RADIO SETS; RADIO AND TELEPHONE RELAYS; TELEVISION TRANSMITTERS; TRANSMITTERS FOR RADIO BROADCAST AND RADIO-TELEGRAPHY; ANTENNAS AND ANTENNA CHANGEOVER CIRCUITS; ELECTRON TUBES AND ELECTRON DISCHARGE APPARATUS; ELECTRICAL CAPACITORS; SOLID STATE ELECTRONIC APPARATUS - NAMELY, LIGHT DIMMERS; THERMOELECTRIC CONVERTERS; TAPE RECORDERS AND DICTATION MACHINES; DYNAMOMETERS; ELECTRICAL TRANSMISSION LINES, CABLE, WIRE AND CONDUCT; NUMERICAL CONTROL ATTACHMENTS FOR MECHANICAL AND ELECTRICAL CONTROL FOR BORING AND MILLING MACHINES AND VARIABLE SPEED AND MAIN AND FEED DRIVES USED IN THE METAL FABRICATION INDUSTRY; ELECTRICAL POWER SUPPLY BUSSES, CABLES, SUPPORTS AND CONTACTS FOR ELECTRICAL TRACTION VEHICLES, AND ELECTRICAL CIRCUITS FOR MONITORING, CONTROLLING AND DISPLAYING OPERATIONS AND OPERATING CONDITIONS IN RAILWAYS SYSTEMS; ELECTRICAL TRANSDUCERS, SIGNAL PROCESSES AND INDICATING AND RECORDING MACHINES FOR MEASURING AND TESTING INSTRUMENTS AND FOR USE WITH REGULATING AND CONTROL APPARATUS; ALTERNATING CURRENT EXCITERS WITH ROTATING DIODES; OZONIZERS FOR USE IN WATER SUPPLY SYSTEMS, CHEMICAL PLANTS AND INDUSTRY; STATIC VAR SOURCES; UNINTERRUPTIBLE POWER SUPPLIES; VOLTAGE REGULATORS AND SYNCHRONIZATION APPARATUS FOR SYNCHRONOUS MACHINES; ELECTROLYSERS FOR THE DISSOCIATION OF WATER; GALVANIZING AND ELECTROPHORESIS UNITS; SUPERCONDUCTORS; SYSTEM MODULES FOR THE ACQUISITION AND DISPLAY OF DATA; LOW VOLTAGE SWITCHGEAR, I.P. CONTRACTORS, THERMAL RELAYS, COMPONENTS OF AUTOMATION SYSTEMS - NAMELY, PUSH-BUTTONS, TIME-LAG RELAY, MICROSWITCHES AND LIMIT SWITCHES, COUNTERS AND PROXIMITY SENSORS, EXPLOSION-PROOF UNITS, CIRCUIT BREAKERS, LOAD SWITCHES AND ISOLATORS, HIGH POWER FUSES, ACCESSORIES FOR DOMESTIC INSTALLATIONS, NAMELY SWITCHES, PLUGS AND SOCKETS, FUSEGEAR, DISTRIBUTION BOARDS, STANDARD COMPONENTS FOR LIGHTING SCHEMES, ALARMS AND WARNING APPARATUS; SEMICONDUCTOR STRUCTURAL COMPONENTS; ELECTRON TUBES; GAS-ELECTRIC, STEAM-ELECTRIC AND HYDRO-ELECTRIC POWER SUPPLY UNITS; AND PARTS FOR ALL OF THE FOREGOING (U.S. CLS. 11, 21, 38 AND 44).

CLASS 10—MEDICAL APPARATUS

FOR SURGICAL, MEDICAL, DENTAL AND VETERINARY INSTRUMENTS AND APPARATUSES, NAMELY ARTIFICIAL LIMBS, EYES AND TEETH, X-RAY MACHINES AND ELECTRON BEAM MACHINES FOR MEDICAL USE; ELECTRIC BLANKETS; HEART PACEMAKERS; HIGH ENERGY LINEAR ACCELERATORS FOR MEDICAL APPLICATIONS, NON-THERAPEUTIC ELECTRIC HEATING PADS; NON-THERAPEUTIC ELECTRIC FOOT WARMERS (U.S. CL. 44).

CLASS 11—ENVIRONMENTAL CONTROL APPARATUS

FOR FURNACES OF ALL KINDS; DISTRICT HEATING PIPES; BOILERS OF ALL KINDS; TOASTERS, SOLAR COLLECTORS, ELECTIC FANS, REFRIGERATING UNITS; STEAM GENERATORS; ELECTRICAL AND FUEL POWERED HEATERS FOR INDUSTRIAL APPLICATION; REFRIGERATING PLANTS FOR FREIGHT CARRYING VEHICLES; AIR COOLERS AND OIL COOLERS; RAW WATER EVAPORATORS; COOLING TOWERS; AIR CONDITIONERS, HUMIDIFIERS, VENTILATORS, STOVE HOODS; FEEDWATER HEATERS AND CONDENSERS; SEA WATER DESALINATION PLANTS; SOLAR PANELS FOR UTILIZATION OF SOLAR ENERGY; ELECTRIC LIGHTS FOR ALL PURPOSES AND APPLICATIONS; DISCHARGE LAMPS FOR LIGHTING; HOT WATER HEATERS; ELECTRICAL HEATERS; ELECTRIC STOVES, SPACE HEATERS, GRILLS, BROILERS, AND PLATE WARMERS; SUN-RAY LAMPS; OVENS, COOKERS AND RANGES; REFRIGERATORS, FREEZERS AND ICE MAKING MACHINES; AIR CONDITIONING MACHINES FOR RAILROADS; ELECTRIC HAND HELD HAIR DRYERS, AUTOMATIC EGG BOILERS; INDUCTION HEATERS; STEAM GENERATORS FOR POWER PLANTS, CLOTHES DRYERS; AND PARTS FOR ALL OF THE FOREGOING (U.S. CLS. 31 AND 34).

CLASS 12—VEHICLES

FOR FORK LIFT TRUCKS, LOCOMOTIVES AND MOTORCOACHES, TRAMS, RAILWAY COACHES, TROLLEY BUSES; MOTORS AND DRIVES FOR LAND VEHICLES; BRAKES FOR LAND VEHICLES; TRUCKS; MOTORS, ENGINES, TURBINES, TRANSMISSIONS, DRIVE TRAINS, AXLE DRIVES AND GEARING FOR LOCOMOTIVES, TRAMS, UNDERGROUND RAILWAYS, TROLLEY BUSES, RACK AND FUNICULAR AND ROPE RAILWAYS AND CABLE CARS, AND BOATS AND SHIPS; ELECTRIC DRIVES FOR RAILBOUND VEHICLES; ANTI-SLIP MECHANISMS FOR VEHICLES; FUNICULAR RAILWAYS; AND PARTS FOR ALL OF THE FOREGOING (U.S. CLS. 19 AND 23).

CLASS 14—JEWELRY

FOR CLOCKS AND WATCHES AND MOVEMENTS FOR CLOCKS AND WATCHES (U.S. CL. 27).

CLASS 16—PAPER GOODS AND PRINTED MATTER

FOR PRINTED JOURNALS AND MAGAZINES, BOOKLETS AND BOOKS FOR THE ELECTRICAL AND MECHANICAL ENGINEERING INDUSTRY (U.S. CL. 38).

CLASS 17—RUBBER GOODS

FOR ELECTRICAL INSULATING MATERIALS, PLASTICS IN THE FORM OF LAMINATES, BARS AND SHEETS (SEMIFINISHED PRODUCTS), MICA AND MICACEOUS PRODUCTS FOR USE IN INSULATING; GLASS FIBERS; INSULATOR BUSHINGS (U.S. CLS. 1, 12 AND 21).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

TRADEMARK REGISTRATIONS CANCELED

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

TRADEMARK REGISTRATIONS AMENDED, CORRECTED, ETC.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

Any change to the registration will be indicated at the bottom of each entry under ELEMENTS AMENDED, CORRECTED OR RESTRICTED. With the exception of changes to the goods and services, additions to the registration will appear in asterisks and deletions of the registration will appear in brackets. Elements which are only changed will be listed with no punctuation. As to the goods/services statement, amendments to the goods/services will appear in asterisks and deletions will appear in brackets. In addition if any change to the goods/services occurs, the element "Goods/Services" will be listed under ELEMENTS AMENDED, CORRECTED OR RESTRICTED.
